OAF 60.1.1: Russian AFV crew morale is 6 and may not Intensive Fire.

OAF 60.1.2: Russian crews operate AFVs as captured equipment (90).

OAF 60.1.3: Russian tanks do not have complete freedom of movement due to lack of wireless equipment. The Russian player must roll one die during his Rally Phase. The resulting number is the number of AFVs that may move that turn. AFVs already on board are not prevented from firing, pivoting, or changing their turret covered arc within the hex they already occupy. Russian AFVs are exempt from this restriction only if they are unbuttoned (commander in CE position) and in the LOS of the designated command AFV (also unbuttoned at the start of the Movement Phase. AFVs entering from off board meet this requirement only if they enter unbuttoned and in the same hex using sequential movement. If the designated command AFV is eliminated or immobilized, another AFV may be so designated at the start of the following Rally Phase.

OAF 60.1.4: Environmental conditions (102.3) are moderate with no wind.

OAF 60.1.5: As the scenario is set prior to 1942, HEAT is not available.

OAF 60.1.6: The Russian player has no more than 6 KV1A’s in the game. The Russian player may determine if his vehicles are equipped with an optional AAMG. Roll 2 Dice once for each vehicle. The rarity factor is 1.2; therefore a DR of 6 or less is required for a vehicle to be mounted with an AAMG. Replace the KV1A without an AAMG with a KV1A which has a mounted AAMG.
