

CRISIS AT ROMNY

OAF Scenario 30.6 (SEP 206)

B061101

Intro Romny, 120 miles east of Kiev; September 18, 1941: As Guderian pushed his Panzers southward; a coordinated Cavalry/Tank Assault struck one weak gap on his left flank.

BOARD CONFIGURATION:

VICTORY CONDITIONS: The Russians win by cleaning Rows 1 through 7 inclusive of Board 1 of all Germany units by the end of the game. The Germans win by avoiding the Russian victory conditions.

TURN RECORD CHART:

⊕ German Sets Up First	★	1	2	3	4	5	6	7	8	9	END
★ Russian Moves First											

⊕ Elements of the 10th Motorized Division set up anywhere using Hidden Initial Placement (42.0):

★ Elements of the 9th Cavalry Division and 31st Tank Battalion enter anywhere along the West edge of Board 3 on Turn 1:

SPECIAL SCENARIO RULES:

SSR OAF 30.6.1: All hills are considered flat open ground.

SSR OAF 30.6.2: Russian tanks do not have complete freedom of movement due to lack of wireless equipment. The Russian player must roll one die during his Rally Phase for every multiple of six (or fraction thereof) remaining mobile AFVs. The resulting number is the number of AFVs that may move that turn. AFVs already on board are not prevented from firing, pivoting, or changing their turret covered arc within the hex they already occupy. Russian AFVs are exempt from this restriction only if they are unbuttoned (commander in CE position) and in the LOS of the designated command AFV (also unbuttoned at the start of the Movement Phase. AFVs entering from off board meet these requirements only if they enter unbuttoned and in the same hex using sequential movement. If the designate command AFV (initially the KVIA) is eliminated or immobilized, another AFV may be so designated at the start of the following Rally Phase.

AFTERMATH: The appearance of a heavy tank force on their exposed flank cause considerable concern for the Germans. The Russians pushed into the suburbs, however, they encountered anti-aircraft weapons and withdrew with only half of their armor remaining.
